

Qualifies for  
1.0 PDH

The ICE invites you to a breakfast presentation on:

*“Innovating for the Future”*

**By: Professor David Balmforth**  
President of the Institution of Civil Engineers

**ABSTRACT:** The world faces major challenges for the future: climate change, population growth, resource depletion, poverty and economic instability. The address will set out how engineers might adapt to play the key role they need to play in tackling these challenges? So that the world has infrastructure that is resilient, adaptable and available to all. It will demonstrate why engineers need to be more innovative, and how this might be achieved in practice. In particular it will deal with the specific enablers and blockers to innovation and will suggest how engineers globally might work on an agenda for change.

## Date and Time

Friday 25th September 2015

**7:30am** for an 8:00am start (1 hour lecture)

## Venue

Arup (4<sup>th</sup> Floor), 77 Water Street  
New York, NY 10005

**RSVP by Monday 21st September 2015**

to Richard Giffen
